

## YOUR PERSONAL, GLOBAL WIFI HOTSPOT WITH IRIDIUM AXCESSPOINT

THE CONVENIENCE OF A WIRELESS INTERNET HOTSPOT - AVAILABLE ANYWHERE YOU FIND YOURSELF GLOBALLY

Iridium AccessPoint is an exciting new accessory for your satellite phone that provides access to your own personal WiFi HotSpot, globally. Designed for use with Iridium Extreme™ and Iridium 9555™ Satellite Phones, the Iridium AccessPoint makes it easy to perform critical tasks such including email, data transfer, and web browsing as if you were in your office or at your home computer.

Simple to use, the Iridium AccessPoint connects directly to your satellite handset's USB port and is ready to provide WiFi service to your compatible devices such as your Blackberry, iPhone, Android Phone, iPad, or Laptop Computer.

Ideal for global business travel, field work scenarios, and adventure tourism; the Iridium AccessPoint is a global connectivity solution that promises to deliver convenience and accessibility to dynamic people on the move.

- ▶ Connect the AccessPoint to Your Iridium Handset (9555 or Extreme) Via USB to Create Your HotSpot
- ▶ Use Your AccessPoint HotSpot With Your Devices (Blackberry, iPhone, Android Phone, iPad, Laptop Computer)
- ▶ Access Your Email and Browse the Web
- ▶ Suitable for Multiple Simultaneous Users
- ▶ Economical Per Minute Fee for Data Usage

Infosat Communications LP is proud to provide our customers with Iridium hardware and Iridium Authorized Tier One Service. For more information on the Iridium Extreme Satellite Phone or WiFi Accessory, please contact Infosat or one of our Channel Partners at:
